

# Toyana BEARING CORP.OF AMERICA

## 5/8 in x 7/8 in x 1/2 in Koyo NRB BH-108 Drawn Cup Needle Roller Bearings

Bearing No. BH-108

|                              |                                |
|------------------------------|--------------------------------|
| d                            | 5/8 in                         |
| cage material:               | No Cage                        |
| D                            | 7/8 in                         |
| maximum rpm:                 | 6500 RPM                       |
| B                            | 1/2 in                         |
| precision rating:            | Not Rated                      |
| drawn cup type:              | Open Ends with Full Complement |
| series:                      | BH                             |
| closure type:                | Open                           |
| lubrication hole type:       | No Hole                        |
| operating temperature range: | Maximum of +250 ° F            |
| standards met:               | ANSI/ABMA 18.2, ASTM F2162     |
| dynamic load capacity:       | 2860 lbf                       |
| compatible inner ring:       | IR-68-1                        |
| static load capacity:        | 4110 lbf                       |
